

# Readme-CN Assignment1

For Basic Follow commands

First in server

```
bash h2-arp.sh
```

```
python server.py
```

after enter

```
"10.0.1.2"
```

In client enter

```
bash h1-arp.sh
```

```
python client.py
```

Then just enter a message in client in for

```
"GET /assignment1?request=key HTTP/1.1"
```

```
"PUT /assignment1/key/val HTTP/1.1"
```

```
"DELETE /assignment1/key HTTP/1.1"
```

For Star Follow Commands

First in server

```
bash h3-arp.sh
```

```
python server.py
```

after enter

```
"10.0.1.3"
```

In cache enter

```
bash h2-arp.sh
```

```
python cache.py
```

after enter

```
"10.0.1.3"
```

```
"10.0.1.2"
```

In client enter

```
bash h1-arp.sh
```

```
python client.py
```

after enter

```
"10.0.1.2"
```

Then just enter a message in client in for

```
"GET /assignment1?request=key HTTP/1.1"
```

```
"PUT /assignment1/key/val HTTP/1.1"
```

```
"DELETE /assignment1/key HTTP/1.1"
```

For GET request I returned two values from the server one for "HTTP 200 OK" and one for value
